

ARGHODEEP CHOWDHURY

Raipur, C.G | (+91) 9031269629 | arghodeep2006@gmail.com | [LinkedIn](#) | [GitHub](#)

Objective

Computer Science student at Shri Shankaracharya Institute of Professional Management & Technology, graduating in 2026, with hands-on experience in full-stack and AI/ML development. Proficient in Python, TypeScript, C++, and frameworks including FastAPI and React. Built and deployed an AI-driven volunteer coordination platform and an automated data cleaning agent. Seeking a software internship to apply engineering concepts and enhance operational efficiency.

Skills

- **Languages:** Python, JavaScript, TypeScript, C/C++
- **Frontend:** React 19, Next.js 14, Tailwind CSS, Vite, Svelte
- **Backend:** FastAPI, Hono (Cloudflare Workers), Express.js
- **Database:** MongoDB, SQLite, Cloudflare D1, Supabase
- **AI/ML:** Google Gemini API, Groq Llama 3.3, TensorFlow, Data Analytics
- **Infrastructure & DevOps:** Cloudflare Workers, Google Cloud Run, Docker, Git, Version Control Systems
- **Software Development Practices:** Testing, Code Reviews, Debugging

Projects

Aegis: Predictive Volunteer Coordination Platform | [GitHub](#)

- Implemented FastAPI backend and Next.js 14 frontend, leveraging Git for version control and conducting code reviews to support AI-driven NGO volunteer coordination.
- Dual AI models: Gemini 2.0 Flash (multimodal) and Groq Llama 3.3 70B (text reasoning).
- Emotion-triggered escalation and 72-hour crisis prediction with offline SMS fallback.
- Containerized deployment on Google Cloud Run using Docker, integrated geospatial features and Redis caching for resilience.

College Attendance Management System | [GitHub](#)

- Built a multi-role web app using React 19 with TypeScript and Tailwind CSS for Admin, HOD, Teacher, and Student interfaces.
- Complete attendance tracking with condonation workflow and OCR integration.
- Implemented JWT authentication with role-based access control and wrote unit tests to validate authorization flows during code reviews.
- Deployed on Cloudflare Workers with D1 database and R2 storage.

Data Cleaning Agent (OpenEnv) | [GitHub](#)

- FastAPI environment for real-world data quality benchmarking.
- Procedural data scenarios with automated graders and interpretable rewards.
- Actions: `fix_dates`, `remove_duplicates`, `fill_nulls`, `standardize`, `detect_outliers`.
- Docker containerized for Hugging Face Spaces deployment.
